

Ornge's Swift Journey to IT Clarity with Faddom

At Ornge, a key organization in the Health and Social Care sector, the IT team adopted Faddom's Agentless Application Dependency Mapping Tool to address their complex infrastructure visualization needs. This technology streamlined their mapping processes, transforming a previously labor-intensive task into a swift and efficient operation crucial for healthcare delivery.

”

It was easy to set up and met our needs. It is very helpful to our developers. Maps are easy to set up and read and share with others.

Alex McFarlane

Infrastructure Analyst of Ornge

Benefits

Rapid Deployment and Immediate Impact:

Faddom was integrated into Ornge's systems with minimal effort, taking only 60 minutes for deployment and demonstrating its value within just one day. This speed is vital in a healthcare setting where every minute counts.

Enhanced Security and Network Understanding:

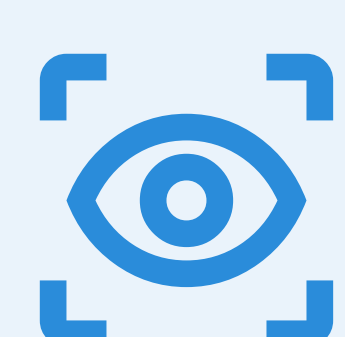

With Faddom, the Infrastructure team gained crucial insights into their network traffic and the security of their IT environment. The tool's ability to provide detailed maps of systems and traffic patterns has not only simplified complex processes but also improved the organization's security posture by highlighting potential risks.

Seamless Collaboration and Ease of Use:

Faddom's user-friendly interface and straightforward setup facilitated better cooperation between developers and IT analysts, ensuring smooth operations without the technical glitches that can disrupt critical healthcare services.

Comprehensive Coverage and Efficiency:

With Faddom's tool, Ornge's IT team gained critical insights into their network and application interactions, which enabled them to make faster and more informed decisions.

Map all your dependencies within your network

Lightweight. No agents.
No credentials. Works
offline

**One person, one hour,
all your servers mapped.**

Faddom provides agentless mapping of on-premises and cloud infrastructure, achieving comprehensive visibility within minutes. Our platform skillfully visualizes servers, business applications, and their interdependencies, significantly enhancing hybrid network visibility posture. Additionally, Faddom promptly detects external threats and vulnerabilities, enhancing network security and safeguarding your infrastructure.
