

# Key Factors That Make Faddom Cost-Effective for IT Mapping

Faddom offers a **powerful, quick and affordable** solution for application discovery and dependency mapping that stands out from the competition. Its pricing model is fair and transparent, with no hidden costs, and is **based only on the number of servers, ensuring you pay for what you need.**

Our tool is **low-cost and high-impact** due to its agentless design, quick deployment, and minimal maintenance, and because it doesn't require teams to spend time on training or frequent meetings, **making it both easy and efficient to use.**

## The Secret Behind Faddom's Budget-Friendly Pricing

Factors	Faddom Passive Agentless	Agent-Based	Agentless Active Scanning
<b>Deployment Cost</b>	Low due to agentless setup, fewer resources needed for deployment	High due to complex agent installation	Medium, but still requires active configuration
<b>Time to Value (Deployment Time)</b>	Deploys in under 60 min with minimal labor and no need to onboarding	Can take weeks, resulting in higher costs	1-2 days, but often with more complex configurations
<b>No Additional Hardware/Software Needed</b>	Uses existing infrastructure without requiring ongoing support or specialized knowledge	Often requires dedicated hardware or specialized software	No extra hardware, but may need specialized configurations
<b>Low Maintenance Costs</b>	Agentless system reduces costs by minimizing team involvement in updates and checks	High, due to agents that need regular updates and monitoring	Medium, requires some maintenance but less than agent-based
<b>Reduced Downtime &amp; Cybersecurity</b>	Quickly identifies risks and vulnerabilities, preventing costly outages and breaches, reducing recovery costs	Higher risk of downtime and slower detection of vulnerabilities due to complex setup	Medium risk—faster than agent-based but less precise than Faddom

### FAST

Fully deployed within an hour.

### SECURE

No agents or credentials needed.

### COST-EFFECTIVE

Pricing that makes sense for you.

Faddom provides organizations with **real-time visibility** into their on-premises, cloud, and hybrid environments, offering a scalable, cost-effective solution **without overspending or compromising quality**.

Our fair pricing **covers all your needs under a single license**—from discovery to network security—making it ideal for businesses of any size.

**80%**

**Faster Deployment  
Compared to  
Agent-Based Solutions**

**67%**

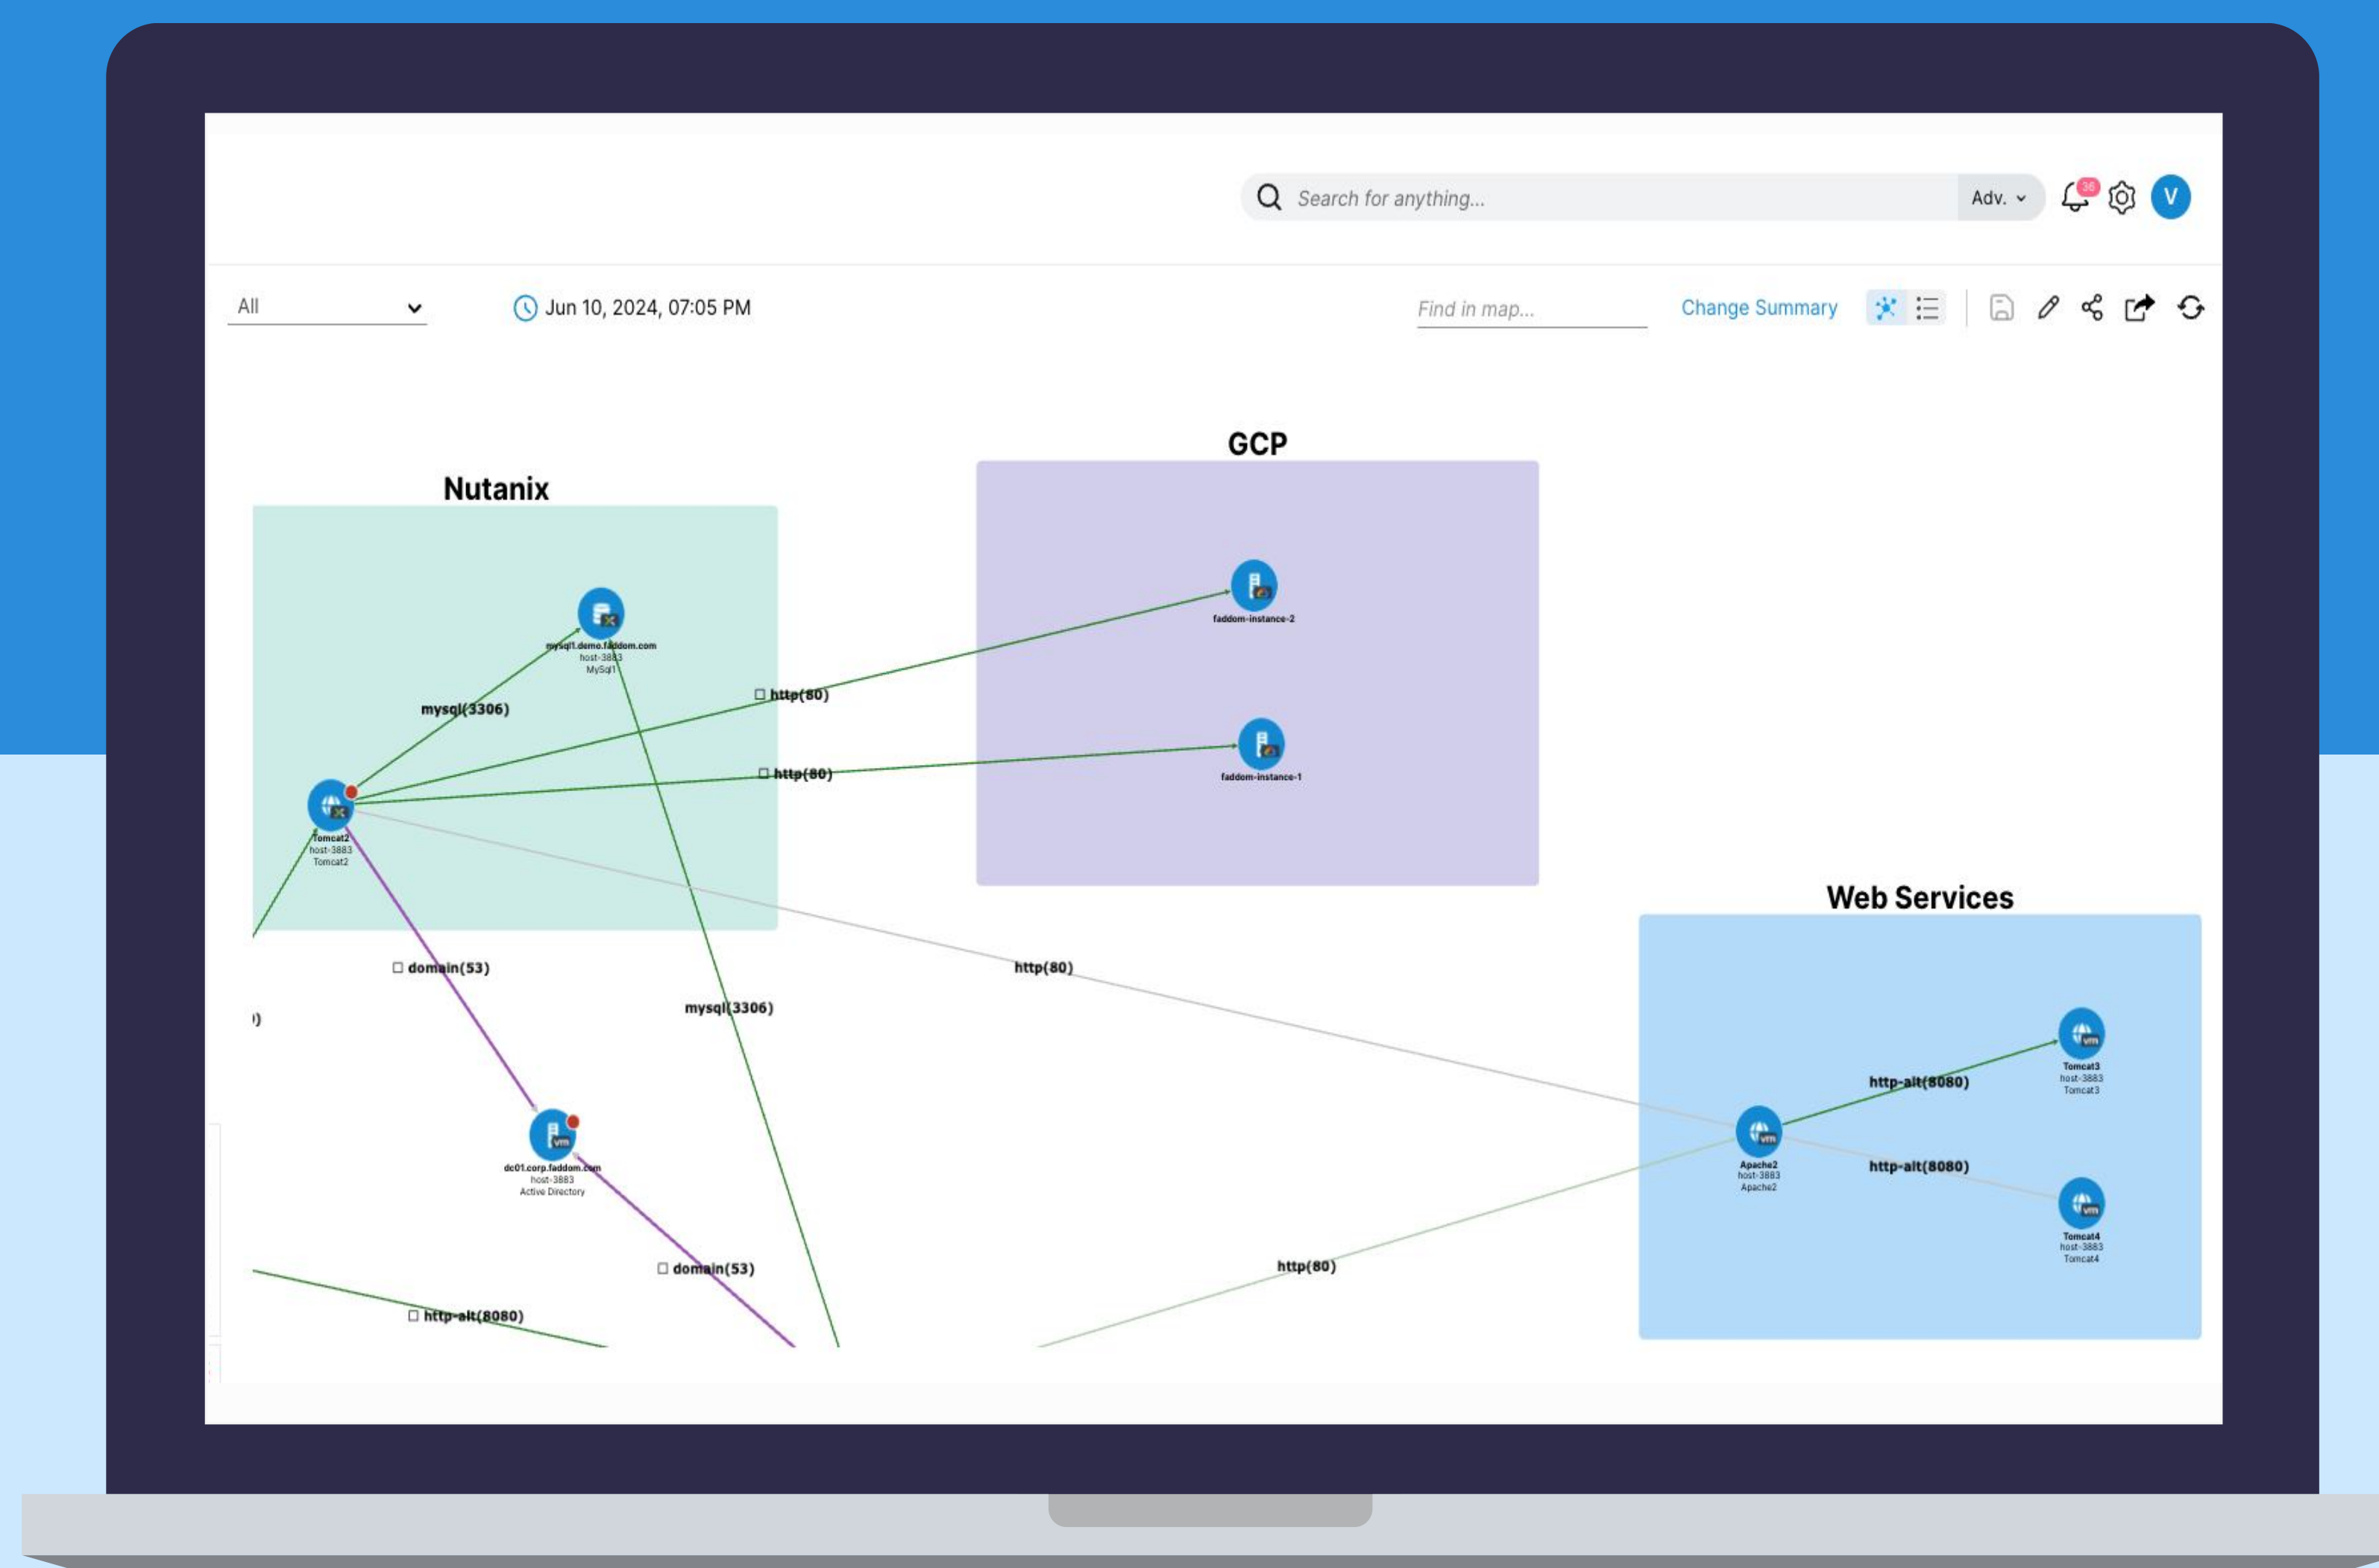

**Of Users Reported Setting  
Up and Operating Faddom  
on the Same Day**

**89%**

**Users Experience a Positive  
Return on Investment  
(ROI) in under 6 months**

**55%**

**More Cost-Efficient  
with Transparent and  
Fair Per-Server Pricing**

## Powerful Mapping, Zero Budget Stress

Visualize your infrastructure and uncover interdependencies—quick, easy, and all without the heavy costs.
