

Faddom

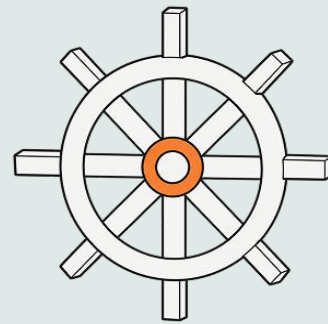

MANUFACTURING

Hybrid IT Visibility at Coreso with Faddom.

Coreso needed visibility beyond firewall logs, which captured routed traffic but missed communication within individual subnets. Their CISO, Steven, was looking to transform how they manage cybersecurity and infrastructure change.

Organization details

- Industry: Utilities
- Employee size: 51-200
- Location: Brussels, Belgium

With Faddom, Coreso gained the context needed to document applications, uncover Shadow IT, and make infrastructure changes with confidence.

Shadow IT Discovery

Previously unknown assets were easily identified across the hybrid IT environment.

Application Documentation

Existing applications and their dependencies were mapped and documented automatically.

Confident Change Management

Communication data made it easier to evaluate application impact before reboots and other infrastructure changes.

Fast

Fully deployed within 60 minutes

Simple

Intuitive setup with little to no learning curve

Secure

No agents or credentials needed

faddom.com

Non-intrusive application dependency mapping.

Faddom is an agentless platform that helps organizations across different industries and regions visualize their entire on-premise and cloud infrastructure as business application maps in as little as 60 minutes.

Be proactive and plan ahead by always having dynamic, accurate IT documentation that updates continuously and automatically 24/7.

Steven Poot
CISO
at Coreso

“

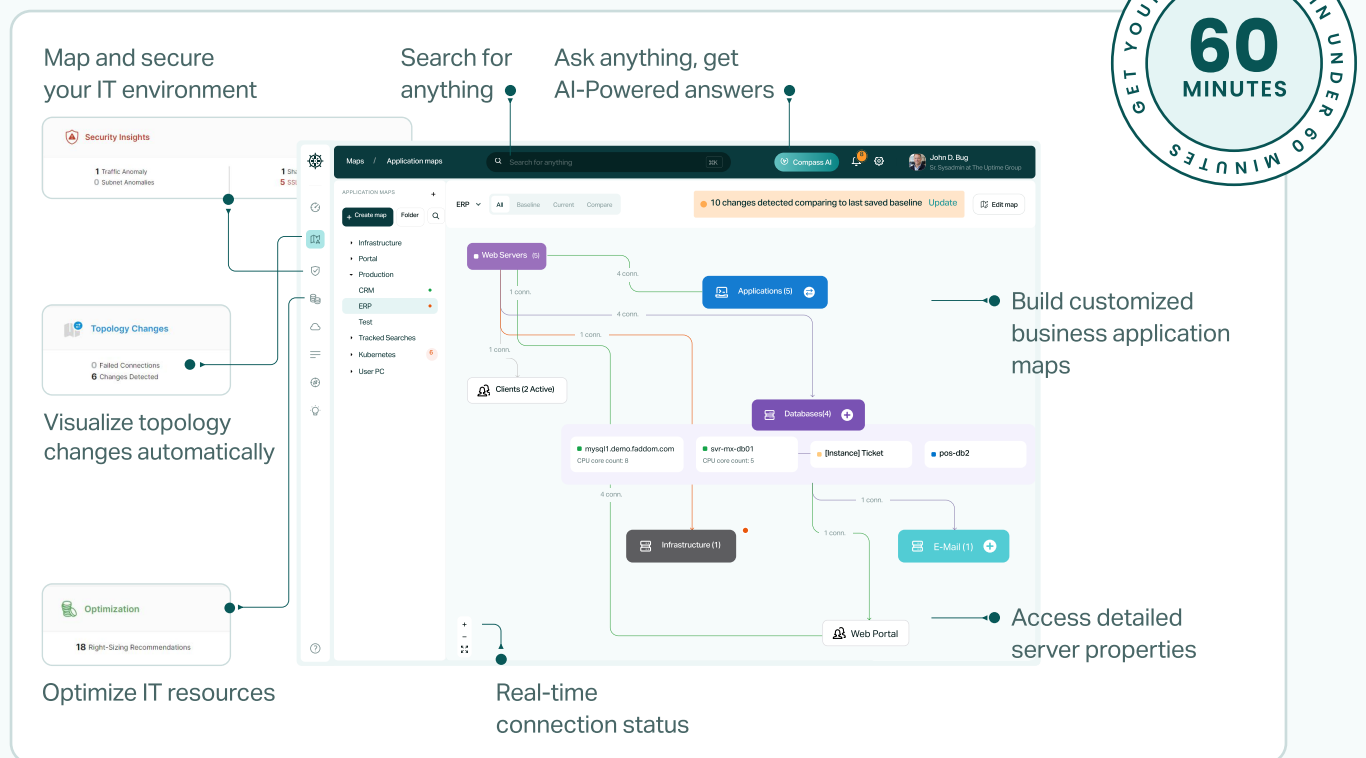

Coreso's experience with Faddom demonstrates how complete dependency visibility can transform cybersecurity and change management. By uncovering Shadow IT and documenting application relationships, the team achieved measurable ROI while making infrastructure decisions with greater confidence.
