

Clear IT mapping at Ornge with Faddom.

Ornge needed a clearer way to understand its IT landscape and communicate application dependencies across teams. Their IT team was looking for greater visibility to improve coordination between infrastructure and development teams and deeper insight into network traffic.

Organization details

- Industry: Healthcare
- Employee size: 501-1,000
- Location: Ontario, Canada

With Faddom, Ornge gained the clarity needed to understand application dependencies, coordinate across teams, and keep its systems running smoothly.

Detailed Dependency Maps

Systems, application dependencies, and network traffic were presented through clear maps.

Cross-Team Coordination

Shareable application maps made collaboration between infrastructure and development teams more straightforward.

Network Traffic Visibility

Greater insight into network activity helped the team understand system communication and identify suspicious traffic.

Fast

Fully deployed within 60 minutes

Simple

Intuitive setup with little to no learning curve

Secure

No agents or credentials needed

Non-intrusive application dependency mapping.

Faddom is an agentless platform that helps organizations across different industries and regions visualize their entire on-premise and cloud infrastructure as business application maps in as little as 60 minutes.

Be proactive and plan ahead by always having dynamic, accurate IT documentation that updates continuously and automatically 24/7.

Alex McFarlane
Infrastructure Analyst
at Ornge

“

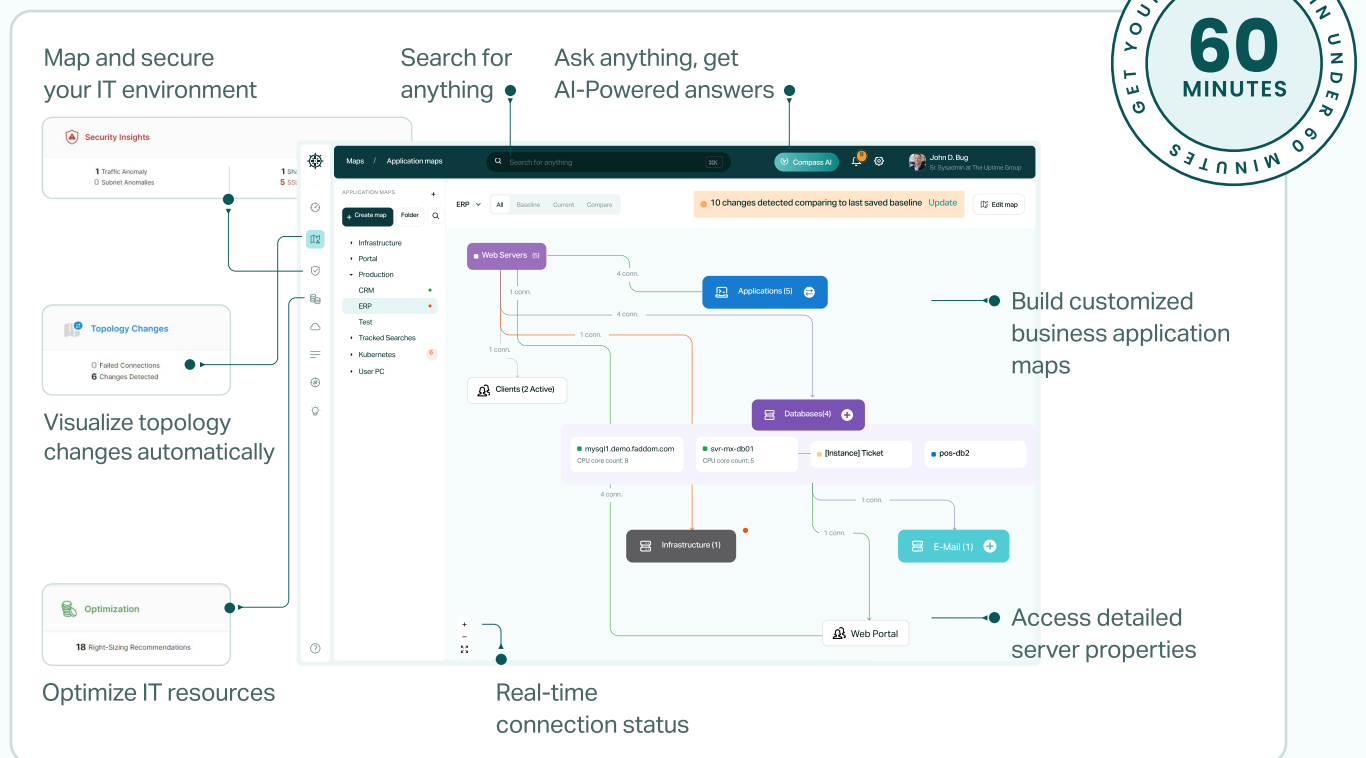

Faddom certainly delivered for us when we needed a clear view of our IT landscape. Setting it up was a breeze, tailored perfectly to meet our requirements. As an Infrastructure Analyst, having an easily sharable and understandable map of our application dependencies makes coordinating with our development team straightforward.”

Key takeaway

Alex's experience with Faddom demonstrates how clear, shareable dependency maps can improve collaboration across IT teams. With a better understanding of applications, systems, and network traffic, Ornge can coordinate changes more efficiently and maintain a smooth, reliable IT environment.
